

Hospital dan klinik

This week, we learned about *Hospital dan Klinik* di Malaysia and the basic terms dealing with hospitals or clinics.

Siapa bekerja di hospital dan klinik?

DOKTOR

Doctor

JURURAWAT

Nurse

AHLI FARMASI

Pharmacist

By Jocelyn

Siapa di hospital dan klinik juga?

PESAKIT

Patient

During class, we watched a video clip of a clinic in Malaysia. Watch the clip [here](#).

Here are the names of the different parts of the clinic as labeled in the clip.

1. **Ruang menunggu:** waiting room/ space.
Menunggu comes from the root word **tunggu**, which means 'wait'.
Menunggu here means 'waiting'.
2. **Kaunter pendaftaran:** registration counter
Pendaftaran refers to 'registration'. The root word is 'daftar'. We can say "**Pelajar mendaftar kursus di MyNIU**" [Students register courses in MyNIU.]
3. **Kaunter ubat:** Medicine counter (the counter where the pharmacist dispense drugs)
4. **Bilik doctor:** Doctor's room
5. **Bilik rawatan:** Treatment room

Rawat is the root word, which means 'to treat'.

6. **Ruang doktor dan pesakit:** The space for doctors and patients

7. Bilik kecemasan: Emergency room

We also learned 'petugas klinik' –clinic workers

We also looked at a **brosur hospital** from Malaysia and answered a series of questions about the brochure.

These are some of the words we came across in the brochure.

Kosa kata:

1. **Pakej pembedahan:** Surgery package
2. **Tidak termasuk:** do/does not include

E.g. Harga pakej tidak termasuk caj Radiologi, Telefon, Pemeriksaan Diagnostik, Ujian Makmal dan cukai kerajaan.

The price for the package does not include the charge for radiology, telephone, diagnostic check, lab test and government taxes.

3. **Bayaran:**payment

There are two types of payment stated in the brochure: **Tunai** dan **Kad Kredit**.

Tunai: cash **kad kredit:** credit cards

(remember **sahaja**, which means *only*?)

4. **Perkhidmatan:** service
5. **Pakej bersalin:** labor package
6. **Pemeriksaan kesihatan:** health check-up
